

HELLO, I'M

Manu M.R.

CSE Student & Front-End Developer

I build bold, responsive digital experiences with clean code, thoughtful interactions, and a strong eye for modern design.

SCROLL

More than just **code.**

I'm a Computer Science student who enjoys turning ideas into polished, interactive websites.

I care about strong visual hierarchy, responsive layouts, smooth interactions, and code that stays readable as projects grow. My goal is simple: create digital experiences that feel intentional—not generic.

When I'm not coding, I'm usually learning new development concepts, exploring creative design ideas, or working on projects that sharpen my problem-solving skills.
